HoldemBot is a universal poker bot for cash and tournaments MTT.

A short-stack strategy

is based on charts, depending on the situation (open-push, push after limp or raise, resteval-push, call push, etc.). When compiling the charts used various training resources (pokerstrategy, Upswing Poker, Exceptional Poker) as well as special programs (SnG Wizard, ICMIZER, Preflop +). The heads-up game uses Nash-based charts. The preflop game with medium and large stack is based mainly on the tight opening range. However, to exclude the exploit, opening range includes some speculative hands (with a random probability of opening).

Postflop features:

- cbet code;
- float;
- check-raise;
-

slowplay;

- bluff;
- aggressive playing with monster-draw;
- calling according to outs

and odds;

- actions randomization (check or bet, call or raise);
- betsize
- randomization.

For making a best actions, the HoldemBot many factors are taken into account:

- the number of opponents in the hand;
- position;
- effective stacksize;
-

hand strenght;

- board structure;
- amount to call (bet size);

- outs and pot odds;

-

initiative;

- the amount of money invested in the bank, etc.

If desired, the bot
strategy can be edited.

Here is a recording of the poker bot game:
